DESIGN ETHOS

The natural world offers a myriad of design possibilities. Each acts as a door, opening up a world of inspiration for us. From the most striking, to subtlest, our designs are a tribute to nature's artistic prowess. Which is why, we find ourselves on a never-ending quest to replicate the best of Nature in our tiles. We source natural products from around the world, dedicating our designs, technology, and manufacturing processes towards providing a closer-to-nature-look. It's more than a way of life for us. It's the ethos we live by, creating designs that make a fashion statement, designs that are natural, and designs that blend-in and reflect a mood.

All this is a product of curiosity. It's the questions we ask ourselves, and the constant feeling of 'enough is never enough' that pushes us to challenge our best, and deliver even better. And it is all brought to life through cutting-edge technology, superior processing systems, and a designer mindset that takes shape in the form of our product offerings - Tiles, Marble and Mosaics.

“MODERN” ARCHITECTURE

Today, kitchen spaces have a mix of traditional design elements as well as modern elements. In late 19th century, when city of Barcelona, Spain was allowed to expand beyond its historical boundaries, a new form of architecture called Modernism Movement was born. Modernisme used organic forms for its inspiration & this type of architecture was largely used by many architects, mainly Antoni Gaudi.

“MODERN” UTILITARIAN

Also known as ABC Art, minimalism is present even today in every walk of life. Inspired from Japanese minimalistic themes & great works of De Stijl & Bauhaus School of Art, NITCO'S Nickle series offers the combination of these movements: De Stijl movement which endorsed simplicity and abstraction and reduced an artwork to its essential form/color & Bauhaus, on the other hand, was founded as an art school in Germany with the goals of promoting mass production and uniting arts and crafts with technology.

Today's modern kitchen has evolved from being a "Women Only" space to Socializing space for family. So, designing of the kitchen has also moved from selection of Women centric decoration to different art forms. NITCO'S Nickle & Spcula Series essentially is based on usage of the certain characteristics of form, light, space, and material along with techniques such as reduction, simplification, and unification..
